PROVIDER ATTESTATION

By my signature below, I verify that the information being disclosed in this enrollment form is complete and accurate to the best of my knowledge. I understand that PANTHERx Rare reserves the right at any time and for any reason, without notice, to modify this enrollment form or to modify or discontinue any services or assistance provided through this Program. Finally, I authorize PANTHERx Rare as my designated agent to use and disclose my patient's protected health information as may be necessary for treatment, payment, and healthcare operations, including to verify the accuracy of any information provided, to verify patient eligibility, to provide for payment and reimbursement, and to forward the above prescription information, by fax or other mode of delivery, to a pharmacy for fulfillment. I allow PANTHERx Rare to email me regarding prescription status updates and act as my prior authorization agent in dealing with prescription and medical insurance companies.

AUTORIZACIÓN DEL PACIENTE

Autorización para el uso y divulgación de información de salud protegida

Autorizo a Arbor Pharmaceuticals, a las compañías que trabajan con Arbor Pharmaceuticals, a mi proveedor de atención médica y a la farmacia, para que usen y divulguen a Arbor Pharmaceuticals, y a las compañías que trabajan con Arbor Pharmaceuticals, mi información médica protegida ("PHI"), como la información proporcionada en el formulario de inscripción de pacientes de TRIPTODUR, mi información de prescripción, seguro y terapia médica. Autorizo la divulgación de mi PHI a personas específicas identificadas en el formulario de inscripción de pacientes de TRIPTODUR. Comprendo que las compañías que trabajan con Arbor Pharmaceuticals, incluida mi farmacia, pueden recibir un pago por el uso y la divulgación de mi PHI. Comprendo que no estoy obligado a aceptar el uso ni la divulgación de mi PHI para recibir TRIPTODUR. Si bien mi PHI se protegerá, usará y divulgará únicamente para los fines previstos, comprendo que una vez que se divulgue, el (los) destinatario(s) podrían volver a divulgarla. Después de dicha divulgación, es posible que la información ya no esté protegida por los términos de esta autorización contra su posterior redivulgación. Comprendo que puedo revocar esta autorización para usar o divulgar mi PHI comunicándome con un representante de PANTHERx Rare por teléfono (833-401-2273) o enviando una carta por correo a Arbor Pharmaceuticals, Attn: 6 Concourse Parkway, Suite 1800, Atlanta, GA 30328.

Al firmar abajo, autorizo el uso y la divulgación de mi información médica protegida según se me explicó anteriormente. Si firma esta Autorización como representante personal de la persona que recibirá TRIPTODUR, indique su relación (p. ej., "madre", "padre", "tutor legal").

IMPORTANT SAFETY INFORMATION FOR TRIPTODUR (TRIPTORELIN)

INDICATION

TRIPTODUR is indicated for the treatment of pediatric patients 2 years of age and older with central precocious puberty (CPP).

IMPORTANT SAFETY INFORMATION

Contraindications

TRIPTODUR is contraindicated in:

- Individuals with a known hypersensitivity to triptorelin or any other component of the product, or other GnRH agonists or GnRH.
- Women who are or may become pregnant. Expected hormonal changes that occur with TRIPTODUR treatment increase the risk for pregnancy loss and fetal harm when administered to a pregnant woman. If this drug is used during pregnancy, or if the patient becomes pregnant while taking this drug, the patient should be advised of the potential risk to the fetus.

Warnings and Precautions

Initial Rise of Gonadotropins and Sex Steroid Levels — During the early phase of therapy, gonadotropins and sex steroids rise above baseline because of the initial stimulatory effect of the drug. Therefore, a transient increase in clinical signs and symptoms of puberty, including vaginal bleeding, may be observed during the first weeks of therapy or after subsequent doses.

Psychiatric Events — Psychiatric events have been reported in patients taking GnRH agonists. Postmarketing reports with this class of drugs include symptoms of emotional lability, such as crying, irritability, impatience, anger, and aggression. Monitor for development or worsening of psychiatric symptoms during treatment with TRIPTODUR.

Convulsions — Postmarketing reports of convulsions have been observed in patients receiving GnRH agonists, including triptorelin. These included patients with a history of seizures, epilepsy, cerebrovascular disorders, central nervous system anomalies or tumors, and patients on concomitant medications that have been associated with convulsions such as bupropion and SSRIs. Convulsions have also been reported in patients in the absence of any of the conditions mentioned above.

Pseudotumor Cerebri (idiopathic intracranial hypertension) — has been reported in pediatric patients receiving GnRH agonists, including triptorelin. Monitor patients for signs and symptoms of pseudotumor cerebri, including headache, papilledema, blurred vision, diplopia, loss of vision, pain behind the eye or pain with eye movement, tinnitus, dizziness, and nausea.

Adverse Reactions

In clinical trials for TRIPTODUR, the most common adverse reactions (≥4.5%) are injection site reactions, menstrual (vaginal) bleeding, hot flush, headache, cough, and infections (bronchitis, gastroenteritis, influenza, nasopharyngitis, otitis externa, pharyngitis, sinusitis, and upper respiratory tract infection).

To report SUSPECTED ADVERSE REACTIONS, contact Azurity Pharmaceuticals, Inc. at 1-800-461-7449, or FDA at 1-800-FDA-1088 or www.fda.gov/medwatch.

The Important Safety Information does not include all the information needed to use TRIPTODUR safely and effectively. For additional safety information, consult the accompanying full prescribing information for TRIPTODUR.
